

27/nov		
17:00 Registration	NVG Meeting 2024 (27-29 November)	
18:00 Dinner		
Dobberke Lecture (Chair: Wendt Müller)		
20:00	Geographic variation in social behaviour and species interactions – is it time to move beyond our study sites	Rose Thorogood
21:00 (tot 23:00) Bowlen @ Zuiderduin		
28/nov		
Session 1 Animal Behaviour & Ecology (chair: Vivian Görlich)		
9:00 KEY NOTE	The role of behavioral traits in shaping emergent properties in ecology and evolution	Thomas Blankers
9:30	From individual differences to speciation: Personality-dependent timing of maturation as a mechanism for rep. isolation?	Alexander Schlatmann
9:45	The evolution of between-sex bonds in primates: a conceptual framework	Liesbeth Sterck
10:00	Variation and Flexibility in the Thermoregulatory Behavior of Temperate and Tropical Adult Moth Communities	Ella Kennedy
10:15	Evaluating wildlife rehabilitation: Do recovered gulls thrive when returned to nature?	Tine Uytterschaut
10:30 Coffee		
Session 2 Animal behaviour (chair: Christian Tudorache)		
11:00	Neophobia across social contexts in juvenile herring gulls: A Registered Report	Frederick Verbruggen
11:15	Is it about information? What drives individual differences in exploration behavior?	Dimphy van Boerdonk
11:30	Aggressiveness is repeatable in hand-raised greylag goose (Anser anser) goslings	Danyang Shi
11:45	Round-the-Clock Monkey Monitoring: Automated Video monitoring of group-housed macaques	Tim-Joshua Andres
12:00 Beach Walk (take away lunch)		
Session 3 Social Behaviour - the emotional side (chair: Michelle Spierings)		
14:00 KEY NOTE	Sounds of emotion: Exploring vocal emotions and auditory enjoyment in animals	Pralle Kriengwatana
14:30	Despotism enhances cooperation in macaque societies	Jorg Massen
14:45	Ultrasonic serenades	Cynthia Bom
15:00	Artoo-Detoo: What imitating a Star Wars droid reveals on allospecific vocal imitation in parrots and starlings	Nick Dam
15:15	Comparison of aggression frequencies and patterns between chimpanzees and bonobos in zoo settings	Emile Bryon
15:30 Coffee		
Session 4 At the human/urban-animal interface (chair: Wouter Halfwerk)		
16:00	Preferences of fast- and slower-growing broilers for different light intensities and spectra	Malou van der Sluis
16:15	The effects of light pollution on migratory three-spined sticklebacks	Danielle Crowley
16:30	Don't scream when you see sharks! Reducing visitor noise in a public aquarium	Fien Demuync
16:45	Signalling in the city – the effects of urbanisation on insect anti-predator strategies	Emily Burdfield-Steel
17:00 Coffee & Posters		

28/nov	Evening	
18:00	General Assembly	
19:00	Dinner	
Baerends Lecture (Chair: Marc Naguib)		
20:00	Life in a Noisy World: How Animals Use and Respond to Sound	Andy Radford
29/nov		
Session 5	Social behaviour and cognition (chair: Sanne Moonman)	
9:00	KEY NOTE Understanding the roots and fruits of our primate brain: How can it help us tackle future challenges?	Karline Janmaat
9:30	Peering into the unknown: an indicator for social learning of food processing tasks in Chimpanzees	Lotte Koot
9:45	Do migration strategies predict responses to a novel environment in noctule bats?	Lysanne Snijders
10:00	Social complexity and communicative repair: a comparison across three primate species.	Anne Marijke Schel
10:15	A mosaic of mutualism between people and honeyguide birds	Jessica van der Wal
10:30 Coffee & Posters		
Session 6	Foraging (chair: Kat Bebbington)	
11:30	Nest-site selection and nest predation in a tropical passerine in relation to food, friends, and foes	Arne van Eerden
11:45	Fruitful connections: a multi-site exploration of the impact of fruit availability and age-sex class on orangutan sociality	Tom Roth
12:00	Understanding the unique predation strategy of a stalking predator (lionfish, Pterois miles)	Davide Bottacini
12:15	Socio-ecology drives adaptive social foraging dynamics in the wild	Ralf Kurvers
12:30	prizes	
13:00 lunch		
15:00 End of the meeting
